1. Name of Scheme

Taurus Fixed Maturity Plan Series M

Type of the Scheme

370 Days Close Ended Debt Scheme

2. Investment Objective

The investment objective of the scheme is to generate income with minimum volatility through investments in a portfolio of debt and money market instruments maturing on or before the maturity of the scheme.

4. Asset Allocation Pattern of the Scheme

Under normal circumstances, the asset allocation pattern will be as under:

Instruments	Indicative Allocations (% of net assets)	Risk Profile
Debt & Money Market Instruments*	100%	Low to Medium

- The Scheme will not invest in Securitised Debt*
- The scheme may, from time to time hold cash for the following reasons:
 - Due to lag in deal date and value date of acquiring an asset
 - Due to marginal difference in maturity date of an asset and the maturity date of the scheme

5. Investment Strategy of the Scheme

For the purpose of achieving the investment objective, the Scheme will invest in a portfolio of Debt and Money Market securities maturing on or before the maturity of the scheme.

The AMC has an internal policy for selection of assets of the portfolio. The portfolio is constructed taking into account ratings from different rating agencies, rating migration, credit premium over the price of a sovereign security, general economic conditions and such other criteria. Such an internal policy from time to time lays down maximum/minimum exposure for different ratings, norms for investing in unrated paper, liquidity norms, and so on. Through such norms, the Scheme is expected to maintain a high quality portfolio and manage credit risk well.

Investments may be made in instruments, which, in the opinion of the Fund Manager, are of an acceptable credit risk and chance of default is minimum. The Fund Manager will generally be guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio.

6. Additional Disclosures related to Investment

a. Credit Evaluation Policy:

Introduction:

The Policy is designed to identify the credit risk involved with a detailed process to identify measure, monitor and manage the risk. The aim of the Policy is to have a structured mechanism towards risk management and thereby benefit from potential opportunities and minimize the adverse effects of risk. The policy aims to identify measure, monitor and manage the risk.

i) Identification

Embedded credit risk is identified as a core risk while structuring the portfolio.

ii) Measurement of Risk

The primary source of credit risk measurement would be the ratings assigned by the external credit rating agencies. The investment team also has internal processes to have their own assessment of the embedded credit risk which is based on both financial and non financial parameters. The mitigation of credit risk happens through a diversified portfolio with limits being set up to prevent concentration risk.

iii) Monitoring Procedures for risk limits

• Limit Approvals

The limits shall be the limits approved by the Investment Policy and Risk Policy. The existing limits may have been reviewed if there are changes in market conditions or any event particular to the credit risk.

• Reporting

The daily reporting & monitoring of limits is the responsibility of the risk management / compliance function. The Fund Managers however have primary responsibility to comply with limits and must ensure adequate processes/controls are in place to avoid breaches.

iv) Management of Risk

The management and mitigation of risks would be the predominant effort of the Fixed Income Investment team. The Fixed Income team shall also adhere to risk norms and ensure that actions have been initiated when deviations are noted.

b. The scheme will not take any exposure to the real estate sector.

c. The scheme proposes to invest in the following instruments:

Certificate of Deposit (CD)

Commercial Papers (CP)

Non Convertible Debenture (NCD)

Treasury Bills

CBLO

Pending deployment of the funds of the Scheme in the above securities / debt instruments, the funds of the Scheme may be parked in Short Term Deposits of Scheduled Commercial Banks, subject to the guidelines issued by SEBI.

d. Intended Allocation:

Instruments (% of Net Assets)	Credit Rating		
	AAA/A1	AA/A2	A/A3
CDs	45%-50%	25%-30%	25%-30%
CPs	-	-	-
NCDs	-	-	-

Investment in the above instruments with 'AA' and 'A' rating will include instruments having rating 'AA+', 'AA-', 'A+' and 'A-'. Instruments in above instruments with rating A1, A2 & A3 will include instruments having rating A1+, A1-, A2+, A2-, A3+ and A3-.

There will not be any variation between intended portfolio allocation and final portfolio allocation with the following exceptions:

(a) Positive variation in investment towards higher credit rating within the same investment category.

(b) At the time of building up the portfolio or towards the maturity of scheme, there could be higher allocation towards cash and cash equivalents.

In case of any deviation in the intended allocation as mentioned in exception (b) above, the same shall be rebalanced within 30 days.

While making the investments the rating prevalent at the time of investment will be considered. In case of any downgrade in the rating, the portfolio would be rebalanced within a period of 30 days.

In case of instruments having dual rating, the most conservative publicly available rating will be considered.

The scheme will not invest in any unrated paper (except for short term Deposits of Banks & CBLO)

7. Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

a) The portfolio of the scheme will comprise of securities issued by central and state governments as also debt & money market instruments issued by corporates as mentioned under the paragraph 'How will the Scheme allocate its assets'. All such securities will normally mature in line with the maturity profile of the scheme. As the securities are normally held to maturity, the interest rate risk is significantly mitigated. The debt securities issued by the corporates do carry a credit risk as also the liquidity risk.

b) The Scheme will invest entirely in Debt/ Money Market Instruments and Government securities. Liquidity in these investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities.

c) Risk Associated with Securitised Debt

The Scheme will not invest in securitized debt

KEY INFORMATION MEMORANDUM - Taurus Fixed Maturity Plan Series M

(370 Days Close Ended Debt Scheme)

d) Credit Risk

In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the scheme information document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. Corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

e) Price-Risk or Interest-Rate Risk

Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

f) Re-investment Risk

Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

g) Risk Factors associated with the use of Derivatives

The Scheme will not make use of Derivatives.

h) Risk Factors associated with Securities Lending

The Scheme will not engage in Securities Lending

i) Listing

As per SEBI Circular SEBI/IMD/CIR NO.12/147132/08 dated December 11,2008 the scheme will be listed on NSE or any other Stock Exchange. However, this does not necessarily guarantee liquidity and there can be no assurance that an active secondary market for the units will be developed or be maintained. Consequently, the Scheme may in the Stock Exchange quote below its face value / NAV.

8. Risk Management Strategies

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The Fund has identified the following risks of investing in debt instruments and designed risk management strategies to mitigate and manage such risks

Interest Rate Risk

By investing in those securities whose maturity tenure matches with the maturity profile of the scheme.

The securities would normally be held to maturity so the interest rate risk would be significantly mitigated.

Credit Risk

By selecting the investment universe carefully to primarily include those securities which have received high rating from the reputed rating agencies like CRISIL. Our Inhouse Research will further study these securities to satisfy itself.

Volatility

Since the scheme is close ended it will hold securities till maturity hence the portfolio would not be subject to volatility.

Concentration risk

The portfolio would be well diversified with internal cap on the % holding in a particular debt security and also follow the SEBI norms of % cap on holding of a security/ sector.

Risk associated with the use of Derivatives

The Scheme will not make use of derivatives

Liquidity risk

At the portfolio level since the securities will be held till maturity the liquidity risk would be taken care of. As there would be no repurchase/ redemption prior to the maturity of the scheme, the need to sell the security during the tenor of the scheme may not arise. By listing the scheme on NSE, liquidity would be provided to the investors to sell / purchase the units of the scheme in dematerialized form.

9. Options Offered

Growth Option

Under this option, there will be no distribution of income and the return to the investors will be only by way of capital gains, if any, at the time of maturity of the Scheme.

If the investor does not clearly specify the choice of Plan at the time of investing, it will be treated as growth option.

Dividend Option

Under the Dividend option, the Trustee may at any time decide to distribute by way of dividend, the surplus by way of realised profit and interest, net of losses, expenses and taxes, if any, to Unitholders if, in the opinion of the Trustee, such surplus is available and adequate for distribution. The Trustee's decision with regard to such availability and adequacy of surplus, rate, timing and frequency of distribution shall be final. The Trustee may or may not distribute surplus, even if available, by way of dividend.

The dividend will be paid to only those Unitholders whose names appear on the register of Unitholders of the Scheme/Option at the close of the business hours on the record date, which will be announced in advance. The Fund is required to dispatch dividend warrants within 30 days of the date of declaration of the dividend.

However, the Trustees reserve the right to introduce new options and / or alter the dividend payout intervals, frequency, including the day of payout.

Default Option

The investor must clearly specify his choice of option. In the absence of such clear instruction, it will be assumed that the investor has opted for 'default' option which is the 'Growth' option and the application will be processed accordingly.

Trading price on the National Stock Exchange or any other Stock Exchange where the units will be listed may or may not be the same as NAV of the units.

10. Maturity

The scheme will come to an end on the maturity date i.e. on the 370th day from the date of allotment. If the maturity date falls on a non business day, the maturity date shall be the next business day.

to the Unitholder. The Trustees reserves the right to suspend/deactivation /freeze trading, ISIN of the scheme and to do all matters with respect to closure of the scheme at the time of maturity at any time 2 business days prior to the maturity. The proceeds on maturity will be payable to the persons whose names are appearing (a) in the register of unitholders of the scheme with the R&T Agent (to whom only A/c statements were issued) (b) beneficiary position details received from depositories after the suspension /deactivation /freezing of ISIN.

Maturity proceeds would be payable to investors as per the bank details available with the R & T Agent in respect of those investors who will be issued Account Statements. In case of demat case, the proceeds will be paid as per bank details provided in the beneficiary position details received from depositories.

11. Listing of the Scheme

It is proposed to list the scheme on National Stock Exchange or any other Stock Exchange(s) in India. In-principle approval has been obtained from National Stock Exchange of India Limited. However, this does not necessarily guarantee liquidity and there can be no assurance that an active secondary market for the units will be developed or be maintained. Consequently, the Scheme may in the Stock Exchange quote below its face value / NAV.

12. Holding of Units

The unitholders in the Scheme would have an option to hold the units in demat form or in the form of Account Statement as per the current practice. However, unitholders who wish to trade in units would be required to have a demat account and therefore must provide their Demat Account details in the specified section of the Application Form. Such applicants are, therefore, required to have a beneficiary account with the Depository Participant of NSDL/CDSL and will be required to indicate in the Application Form, DP's Name, DP ID number and the beneficiary account number of the applicant with the DP.

13. Liquidity

Repurchase facility

No redemption/repurchase of units shall be allowed by the Mutual Fund prior to the maturity of the scheme. Investors wishing to exit before maturity may do so, only in demat mode, by selling through National Stock Exchange(NSE) or any other stock exchange where the scheme will be listed.

14. Redemption of Units

No redemption/ repurchase of units shall be allowed prior to maturity of the scheme. Investors wishing to exit may do so by selling their units in dematerialized form through the NSE where the scheme is proposed to be listed. The scheme shall be fully redeemed on the date of maturity and redemption proceeds shall be paid out within 10 business days.

15. Transfer of Units

If the units are issued in demat form, they are transferable in accordance with the provisions of SEBI (Depositories and Participants) Regulations as may be amended from time to time. The Transferor should issue delivery instructions for transfer of units in requisite form as may be required from time to time and will have to be lodged with the DP for effecting transfer in accordance with such rules/regulations as may be in force governing transfer of securities in dematerialized mode.

16. Applicable NAV (after the scheme opens for repurchase)

21. Benchmark Index

22. Dividend Policy

Under the Dividend Plan, it is proposed to declare dividends subject to availability of distributable profits, as computed in accordance with SEBI Regulations. Dividends, if declared, will be paid (subject to deduction of tax at source, if any) to those Unitholders whose names appear in the Register of Unitholders on the notified record date. However, it must be distinctly understood that the actual declaration of dividend and the frequency thereof will inter-alia, depend on the availability of distributable profits as computed in accordance with SEBI Regulations. The decision of the Trustee in this regard shall be final. There is no assurance or guarantee to Unitholders as to the rate of dividend distribution nor that dividends will be paid regularly. In order to be a Unitholder, an Investor has to be allotted units against receipt of clear funds by the Scheme or the investor has to be a unitholder by virtue of transfer on account of purchase from secondary market through NSE or any other Stock Exchange. On payment of dividends, the NAV will stand reduced by the amount of dividend and dividend tax (if applicable) paid.

If the Fund declares dividend under the Scheme, AMC shall dispatch the dividend warrants within 30 days from the date of declaration of dividend /Dividend amount will be credited to the bank accounts of investors available in beneficiary position details received from depositories.

23. Applications Supported by Blocked Amount (ASBA) facility

Investors will also have an option to subscribe to the units of the Scheme during the New Fund Offer period under the Applications Supported by Blocked Amount (ASBA) facility which would entail blocking of funds in the investor's bank account, rather than transfer of funds, on the basis of an authorization given to this effect at the time of submitting the ASBA application

form. Investors applying through ASBA should carefully read the applicable provisions before making their applications.

24. Non Acceptance of Third Party Instruments

Applications accompanied by a Third Party Instrument will be rejected. Applications accompanied by pre-funded instruments (such as demand drafts, pay order etc.) will also be rejected unless accompanied by a banker's certificate evidencing the source of the funds. Third Party Instruments are defined as under:

- When a payment is made through instruments issued from an account other than that of the beneficiary investor, the same is referred to as Third-Party Instrument Payment. Applications with such instruments will be rejected.
- It is clarified that in case of payments from a joint bank account, the first holder of the mutual fund folio has to be one of the jointholders of the bank account from which payment for investment is made.
