Face Value changed from ₹ 10 to ₹ 1000 w.e.f. 20th Feb., 2010. Historical NAV adjusted as per new Face value of ₹ 1000

Fund Manager's Comment: Liquidity conditions remained stable during the month as the banking system availed of similar borrowing from the RBI LAF window as witnessed in the previous month. The short term rates remained stable and range bound during the month. The accruals of the scheme remain unchanged as the AUM decreased marginally. The scheme also had larger allocations to Bank CDs compared to the previous month. The Average maturity of the portfolio also witnessed a marginal increase. We intend to maintain a judicious balance between bank and non bank assets taking into account the risks embedded in the various asset classes. The fund continued to deliver consistent performance during the previous month. We would continue to have a judicious mix of assets in order to deliver consistent optimal performance.

Fund Manager's Comment: The duration of the portfolio decreased during the month. We exited our from our GOI security position initiated last month, after capturing the fall in GSec yield and increased our exposure to shorter duration corporate bonds. We will continue with our strategy of staying invested and trading in gilts in the scheme when the opportunity arises. We plan to reduce the maturity as and when we see the direction of the rates turning against the positions.

Fund Manager's Comment: The scheme witnessed a healthy rise in funds managed during the month. While the average portfolio maturity remained unchanged, we invested the incremental flows largely in longer duration Bank CDs and a small proportion in longer dated bonds. We also initiated few trades in the dated securities, so as to play the interest rate move. We plan to reduce the maturity as and when we see the direction of the rates turning against the positions.
