# FROM THE CEO'S DESK

Dear Investor,

India's GDP growth for Q1 FY11 at 8.8% was on the expected lines and lent credence to the view that we are on track to end the fiscal with a GDP growth of 8.5 to 8.6%. With rain gods smiling on India, monsoon is expected to be near normal across the country with few pockets experiencing excess rains and few others deficient rains. With expectation of good harvests and international prices of crude oil remaining low, inflation is expected to gradually taper down. Corporate India continues to witness robust growth. Even though RBI had indicated a calibrated approach towards increasing policy rates, with two hikes already affected in July'10 we feel that the Central Bank may shy away from increasing the policy rates at the next quarterly review meeting on 16th September.

The FII's continued to be net buyers of Indian equities. With net buying of USD 2.5 bn during August, their cumulative net investment in calendar 2010 has already crossed USD 12.9 bn. In spite of this, Indian stock markets moved in a narrow range and ended the month with marginal gains. The sentiment to a great extent continued to be influenced by the US events. The opinion is divided on the US economy -with one set of analysts believing that US has moved out of recession and has embarked on a recovery path while other set of economists still look at the specter of double dip recession. The recent pronouncements of Mr. Bernanke lead one to believe that Fed is in no hurry to follow the 'exit route' and may keep interest rates low for at least another two / three quarters. Global markets including India seem to be getting swayed by the daily/weekly/ monthly announcements of US Housing / Employment / Job data. These uncertainties also led to global investors seeking the safe haven of gold and the yellow metal once again ended the month with its price close to all time high. I believe that it is only a matter of time before some of the emerging markets including India start performing on the basis of their inherent strengths.

We believe that it's a good time to be invested in India and investors with foresight & patience will reap handsome rewards. It will be in the investors own interest to allocate a portion of his long-term investment corpus to Indian equities in a systematic gradual manner. Mutual Funds offer the millions of Middle Class investors in India a convenient medium to save & invest as per his/her ability and plan a rewarding & comfortable retirement. All our equity funds are doing well and have improved their relative ranking on the performance parameters. As of August end, our ELSS fund - Taurus Tax Shield has regained the top slot not only in the last 1, 2, 3 months but also continues to be the top performing tax saving fund in the 3 years time-frame. Our recently launched Taurus MIP Advantage has reopened for ongoing subscriptions and the mix of three asset classes - debt, equity & gold distinguishes it from a normal MIP, making it an ideal recipe to cater to those investors who look forward to returns higher than offered by fixed income instruments and are ready to take moderate risk. Our Fixed Income team continues to deliver superior returns in all our debt schemes with a suitable portfolio mix without taking undue credit & duration risk.

The Govt. tabled the Direct Tax Code Bill in the Parliament and is likely to come into effect from April 1, 2012. It is a welcome step to rationalise & simplify the tax structure even though many of the bold measures proposed in the original bill have been watered down. It's unfortunate that ELSS does not figure in the tax saving instruments. It was the only tool available to the investors to get a tax break with exposure to equity along with potential for higher returns. Proposal to impose Dividend Distribution Tax of 5% on dividends from equity mutual funds is another dampener. The proposal to continue with a tax free status for long term capital gains on equity mutual funds is the bright spot.

With greetings & best wishes for the festivals of Eid & Gannesh Chaturthi.

Kind regards,

Yours truly,

A handwritten signature in black ink, appearing to read 'Waqar Naqvi'.

**Fund Manager's Comment:** Conscious efforts were taken to reduce the turnover. Among the top 10 stocks, ONGC and ICICI Bank outperformed the market while RIL underperformed the market. Key Addition is Apollo Tyre and Tata Chemicals. Government deregulation continued during the month in form of the shifting from analogue to digital network by 2013. This makes us confident of the government's intention towards a strong competitive play in the economy. Submission of the DTC attracted a mixed views but lower tax on the hands of individuals will help to push the domestic demand. We continue to remain invested in the companies with focus on the domestic demand.

**Fund Manager's Comment:** The fund continued to fare well the Infrastructure and diversified to equity category. Efforts were taken during the month to bring down the turn-over ratios. Key addition includes GSPL and Adani Enterprise. As the monsoon season is near to end we expect the growth in the infrastructure project and expect more order to flow to the players. Most of the companies in the sector have strengthened their balance sheet and are well equipped for timely completion of the projects. We continue to maintain our reference to companies with strong execution track and visibility of revenue growth in near future.

**Fund Manager's Comment:** A concentrated portfolio has helped since inception of the fund and we will continue to adopt the same strategy especially in the wake of limited universe available for investing. Among the top 10 holdings, Rallis India and Navneet Publications outperformed and Divis Lab underperformed the market. Given the limited universe of the investment the stock selection is the key factor in the performance. We continue to invest in the companies with strong cash generation model and high asset turnover ratio.

**Fund Manager's Comment:** The fund continues to be in the top quartile in the 3 yrs time-frame in the ELSS category. The number of stock reduced to 33. The fund continues to be well-diversified with exposure to a large number of sectors and stocks. Among the top 10 stocks, Aurobindo and SBI Outperformed the market while RIL and Volta underperformed the market. Key Additions are Indian Hotels and Tata Chemicals. The Indian economy is on firm footing as far as the long term scenario is concerned. GOI's plan to increase expenditure and thrust to agriculture will be a major driver for this. We continue to believe on the domestic demand growth and increasing in the discretionary expenditure. We remain overweight on sectors dependent on the domestic demand.

**RISK FACTOR:** Mutual Fund investments are subject to market risks. Please read the Scheme Information Document carefully before investing.

**Fund Manager's Comment:** The performance of the scheme closely remains in line with the performance of the Nifty Index. Q1 FY11 GDP at 8.8% is in line with expectation and was visible in the RBI's recent monetary policy document. Nifty being consist of good companies from across the sector is well poised to reap this benefit. We believe the fund is well equipped to become a capital appreciation tool for the investors who are looking to add diversification to their investment portfolio.

**Fund Manager's Comment:** The fund is brought in line with its benchmark index-BSE100. The churn ratio of the portfolio continued to be low during the month. Total number of scheme remains at 32. Among the top 10 stocks, ICICI Bank and Ranbaxy outperformed the market while RIL underperformed the market. Key additions include Hindalco and Indian Hotels. With the market entering into nervous zone on the back of the fragile global recovery we build up the portfolio with a focus on stocks with strong earning and sustainable performance. Being a large cap focus fund we expect the scheme to be a good option to take exposure in the broader market.

# TAURUS DISCOVERY FUND - AN OPEN-END EQUITY FUND WITH MID CAP AND SMALL CAP FOCUS

## SCHEME FEATURES

### Investment Objective

The primary objective of the Scheme is to identify and select low priced stocks through price discovery mechanism, which would broadly include: • To capitalise on available opportunity on growth potential offered by undervalued penny stocks. • Such stocks being low priced and if dividend paying, decent dividend yield will give desired cushion in the volatile capital market. • Lower side risk is minimum in such investments. • Many of such cases where investment will be made, may be turnaround cases, therefore, greater potential for improvement in NAV.

### Liquidity

Sale & repurchase on all business days.

### Tax Benefits

Tax-free dividends in the hands of investors, no Gift Tax, no Wealth Tax as per the present Income Tax Act.

**Fund Manager's Comment:** During the month, the fund adopted a more focussed approach with reduced stock count. Also, the fund was brought more in-line with the benchmark index. The benefits of the same will be felt in the coming months. Among the top holdings, Apollo Tyre and Bajaj Auto Finance outperformed the market. Key additions include Apollo Tyre and Bajaj Auto Finance. The mid cap and small cap indices continue to outperform the benchmark on the back of strong traction in earning growth and a good visibility of business environment. We continue to invest in companies with strong business track, which are available at huge discount to the peers.

**Fund Manager's Comment:** Liquidity situations improved in the month of August. The Assets under Management (AUM) of the scheme decreased marginal during the month. We positioned the portfolio being keeping in mind the expected attrition in AUM in the coming month with allocation to bank assets and cash component forming a sizeable (55%) of our AUM. This has also led to a reduction in our average maturity of the portfolio. We continued to deliver consistent performance during the previous month. We would continue to have a judicious mix of assets in order to deliver consistent optimal performance.

## DIVIDEND HISTORY

Rs. 12 per unit dividend in July 2010.

Re. 0.30 per unit dividend in February 2002.

**Fund Manager's Comment:** The scheme continues to be run in a very conservative manner keeping a low average maturity/duration for the portfolio. This has resulted in maintaining performance in the scheme in a rising interest rate scenario. The low risk strategy would be continued till we see some clarity on the direction of the interest rates and the stance of the monetary policy in September. We would continue to have a judicious mix of assets in order to deliver consistent optimal performance.
