Fund Manager's Comment: Liquidity continued to remain in the negative zone in November similar to previous month. But, RBI provided liquidity to the system through OMO operations after a gap of nearly 10 months. This eased the pressure across the yield curve, especially in the long end of the curve. Short term money market rate moved up by 15 bps in the month because of lack of demand by Mutual Funds. The accruals of the scheme remained unchanged. The scheme also had larger allocations to Bank CDs compared to the previous month. The Average maturity of the portfolio also witnessed a marginal decrease. We intend to maintain a judicious balance between bank and non bank assets taking into account the risks embedded in the various asset classes. The fund continued to deliver consistent performance during the previous month and will strive to continually achieve the same.

Fund Manager's Comment: The duration of the portfolio decreased during the month. We exited out from GOI security position initiated last month, after capturing the fall in G-Sec yield and increased our exposure to shorter duration money market instruments. We will continue with our strategy of staying invested and trading in gilts in the scheme when the opportunity arises. We plan to reduce the maturity as and when we see the direction of the rates turning against the positions.
