Fund Manager's Comment: We believe investment themes have expanded in India since the new government has come into the power and focussed on development and governance through its various reform agenda i.e. Defence, Railways, and Make in India, Swachh Bharat, Digital India, Tourism, NamamiGange and other specific initiatives. We are also enthused by the Governments effort to bring efficiency, transparency, governance in the business. Most of these initiatives have direct impact on the economy and companies in medium and growing sectors. We have positioned our portfolio across these themes and companies that will have sustainable growth in coming years. We see upside to these ideas to have much larger than some of the large well run efficient companies.

Fund Manager's Comment: Portfolio composition has decisively moved towards Infrastructure, Capital Goods, Engineering and Construction and related sectors. This is despite heavy composition of defensives in benchmark Index. This has caused increase of portfolio beta. Portfolio is underweight in FMCG, Pharma and IT sector. Re-alignment in the portfolio has been due to broad based recovery in the economy and consequent benefit to Industrial companies.

Fund Manager's Comment: True to its mandate, the portfolio maintained its character for infrastructure themes. The recent effort in pushing massive infrastructure project has induced positive sentiments in the sector. The significant policy reforms in coal, gas and power sector is providing significant boost to the sectors future outlook. Infrastructure remains an important pillar of India growth story and we have strong conviction of come back in near future. Sector has been under pressure since last few years due to multiple factors. We expect the sector to outperform in the coming times. There is no major change in portfolio construction.

We are also enthused by the Governments effort to bring efficiency, transparency, governance in the business. Most of these initiatives have direct impact on the economy and companies in medium and growing sectors. We have positioned our portfolio across these themes and companies that will have sustainable growth in coming years. We see upside to these ideas to have much larger than some of the large well run efficient companies.

Fund Manager's Comment: Shorter end of the non-slr curve saw some profit booking after RBI's decision on FII debt investment. RBI said in its policy that incremental investment by FIIs will be allowed only in bonds with tenure of three years or more. Yield on top notch 5Y and 10Y paper moved up by ~7bps and 5bps respectively in February.

The AUM of the scheme decreased during the month. We continue to balance allocation between Bank and Non-bank assets to improve accruals. The portfolio duration was increased. We would continue to have a judicious mix of assets in order to deliver consistent optimal performance.

EQUITY SECTOR ALLOCATION

Fund Manager's Comment: Debt: Bonds gave up their positive momentum after FM's revised fiscal deficit figures. The journey for fiscal deficit target of 3% will be achieved in 3 years rather than 2 years. The fiscal deficit targets are 3.9%, 3.5% and 3.0% in FY 2015-16, 2016-17 & 2017-18 respectively. Corporate bonds too saw some profit booking ahead of budget. Yield on top notch 5Y and 10Y paper moved up by -7bps and 5bps respectively in February.

The duration of the portfolio increased on account of reduced AUM. We will increase the maturity as and when we see the direction of the rates turn favourable for capital gains. We will continue with our strategy of trading in gilts as opportunity arises with a judicious mix of corporate bonds to enhance accruals in the scheme.

Equity: Portfolio has deployed near optimally into equities. Broad based recovery in the economy and potential outperformance of mid-cap over large-cap reflects in portfolio composition. Portfolio has witnessed inclusion of many new absolute ideas in the recent time.

Gold: Diminishing threat of Global crisis across two major continents in recent times saw shift of money towards risky assets. Gold is bearing brunt of this and witnessing softening of prices over the last few quarters. With continuing benign global economic environment it is unlikely to expect significant outperformance of Gold over equity and other asset classes. Portfolio tries to maintain the minimum required exposure to Gold and do not expect any change in near term.
