Fund Manager's Comment: True to its mandate, the portfolio maintained its character for infrastructure themes. The recent effort in pushing massive infrastructure project has induced positive sentiments in the sector. The significant policy reforms in coal, gas and power sector is providing significant boost to the sectors future outlook. Sector has been under pressure since last few years due to multiple factors. There is no major change in portfolio constructions. Infrastructure remains an important pillar of India growth story and we have strong conviction of come back in near future. Steps have been already initiated by the policy makers to fast forward the clearance and remove the hurdles on the ground to revive the cycle again. We expect the sector to outperform in the coming times.

Fund Manager's Comment: Portfolio composition is built around large weights of absolute ideas. Sentiments have turned positive for mid cap sector in the market due to attractive valuations and large discounts to their large cap peers. 2Q Quarterly numbers have also provided the fillip to many mid cap companies due to better financial numbers. We have consolidated the existing position in the portfolio and process has also helped portfolio trim the number of stocks in portfolios. Portfolio witnessed entry of many new absolute ideas and portfolio beta has improved marginally. Mid cap portfolio absolute ideas has the potential to deliver larger return than market in coming period.

EQUITY SECTOR ALLOCATION

Fund Manager's Comment: Debt: The duration of the portfolio was decreased. The 10 yrs benchmark yield moved down to 8.65% from the previous month's close of 8.83%. With the election outcome coming in the favour of BJP to form government, market rallied on hopes of improving economic fundamentals. We also saw huge foreign participation. We will increase the maturity as and when we see the direction of the rates turn favourable for capital gains. We will continue with our strategy of trading in gilts as opportunity arises with a judicious mix of corporate bonds to enhance accruals in the scheme.

Equity: We maintain a lower equity exposure in the volatile times and are running a concise portfolio with large investments in technology, Oil and Gas and financials. We continue to scout opportunities across sectors and market capitalization to add to this portfolio to gain from a depressed environment.

Gold: The yellow metal has been increasingly volatile since the fall from the peak. With a continued high current account deficit, the government has put in measures to reduce the consumption of gold through higher import duty and a ban on gold leasing through the international trade route. We believe gold to be a good investment in these uncertain times and while these measures will hurt gold volumes, it remains an attractive investment in these times.
