FROM THE INVESTMENT DESK

Dear Investors,

As we commence the earnings journey of FY19, the overall picture is looking brighter, even as macros have deteriorated amid a volatile global trade environment. The story continues to be a case of improving micros and challenging macros (crude oil price inflation, currency, rising bond yields).

The last quarter has been eventful be it the trade-war talks, volatile currency movements, political tensions, high crude prices, rising interest rates etc. FII's were sellers to the tune of \$3bn in the last quarter which, was matched by the domestic flows. While the broader Indices Nifty/Sensex were flattish, there was considerable ruffle among the mid-cap/small cap counters, the indices of which fell 15-20%. This, we believe, is a mean-reversion process post a stellar FY2017 for the mid-cap/small-cap stocks.

Demonetization, GST, e-way bill, LTCG has resulted in temporary flutter to the otherwise structural growth story for India. The demand postponed due to these disruptions may come back like a spring and that too in an election year! The green shoots are visible. This coupled with the GST benefits and operating leverage, augurs well for corporate earnings.

From an earnings viewpoint, we believe that FY19 will be characterized by [a] bottoming out of asset quality pressures for PSU Banks and Private Corporate lenders, [b] strengthening consumption trends in an election year, with forecast of a normal monsoon and multi-year-high MSP hikes announced by the government. Consumption, both rural and urban, will be an engine of growth this year, [c] earnings rebound from hitherto laggard sectors like Information Technology, Healthcare and core sectors/ industrials [d] revival in the broader private capex-cycle.

Overall, we continue expecting FY19 to herald the earnings recovery for India, although the market will remain distracted by several global and local macro events such as the ongoing global trade war, US Fed rate increase cycle, potential moderation in domestic equity flows, and political developments around CY19 general elections.

As always, we value your investments and look forward to your continued patronage.

Fund Manager's Comment: True to its mandate, the portfolio maintained its character for infrastructure themes. The recent effort in pushing massive infrastructure project has induced positive sentiments in the sector. The significant policy reforms in coal, gas, infrastructure and power sector is providing significant boost to the sector's future outlook. Infrastructure remains an important pillar of India growth story and we have strong conviction of its come back in near future. Sector has been under pressure since last few years due to multiple factors. We expect the sector to outperform in the coming times.

Fund Manager's Comment: The scheme will try to invest in emerging themes in the next few years and play it through a blend of mid-cap and large cap stocks. For example, the Indian government's ambitious target of doubling farm income by 2022 should benefit stocks in the rural theme. Similarly, GST will lead to formalisation of economy and benefit sectors where the share of unorganised players is higher. Again, government's 'Housing for All' project will benefit cement, building material players and Housing Finance companies. The scheme will try to construct a portfolio in-and-around such emerging themes.

Fund Manager's Comment: Scheme has bias towards high quality large cap stocks with overweight position in BFSI and rural consumption plays. The sustained regulatory change and positive policy frame work coupled with economic recovery should prove to be tailwind for the stocks in the BFSI sector. The Indian government's ambitious target of doubling farm income by 2022 should benefit stocks in the rural theme. Increase in weight in the cyclical commodity sector is tactical in nature.

Fund Manager's Comment: Our overall call has been inspired by the revival of the demand in the areas of specific focus by Government. We have added few more NBFC's to take advantage of this. We have maintained a positive bias on Private Banks given their resilience to generate profitability in stressed times. In PSU banks the exposure has been restricted to larger players with relatively improving asset quality outlook and faster prospects of stabilisation.

Fund Manager's Comment (Equity Schemes):

June was an eventful month which kept markets fairly volatile beginning with central bank's tightening and tapering plans. This was followed by trade war related tensions between US and China and then the OPEC meet on oil supply decisions. Domestically, progress of monsoons and rupee movement kept markets on edge.

Market valuations were earlier supported by easy money from global markets which has now started seeing reversal as monetary tightening and tapering has begun. This has moved up the yields in global markets which is resulting in net outflows from FPIs (both in equity and debt). With rise in yields - both globally and domestically, cost of capital has resulted in valuation de-rating and henceforth, earnings revival is likely to drive markets higher. Earning revival is likely to be led by sectors such as private sector banking, IT, as well as consumer facing companies leveraged to rural economy. The downside risks to earnings are likely to come from higher oil prices, higher interest rates and corresponding slowdown in demand revival (if any).

Monsoon progress, MSP announcements, inflation, oil price movement, GST collection, etc. would all be important variables to watch out for in determining fiscal deficit and interest rate movements going forward.

Given the volatility and current state of markets, we have been following growth and momentum strategy for our portfolio. This strategy will result in higher portfolio churn.

Fund Manager's Comment (Fixed Income Schemes):

Significant developments/data releases in June 2018 were as under:

- The monetary policy committee of the RBI raised the benchmark policy interest rate (the repo rate) by 0.25%. This is the first increase in policy rates in more than 4 years. The repo rate now stands at 6.25% while the reverse repo rate and the rate gets reset to 6.00%. The rate for availing marginal standing facility is now 6.50%
- Inflation projections for 2018-19 were revised to 4.8-4.9% in H1 of 2018-19 (4.7-5.1% previously) and 4.7% in H2 of 2018-19 (4.4% previous)
- Growth projection for financial year 2018-19 was however left unchanged at 7.4%.
- The monetary policy stance continued to remain "neutral".
- Inflation based on YOY change in consumer price index (CPI) for the month of May 2018 came in at a four month high of 4.87%. This figure for the previous month was 4.57%. Core CPI inflation, which excludes food and energy prices, was even higher at 6.18% compared to 5.92% a month ago.
- Inflation based on the wholesale price index (WPI) also accelerated to a 14 month high of 4.43% in May 2018 compared to 3.18% a month ago.
- India's current account deficit (CAD) rose to USD 13.06 bn in Q4 of financial year 2017-18 as against USD 2.6 bn in the corresponding period last year.
- The US Federal Reserve hiked its benchmark short term interest rate by 0.25% and indicated that two more increases are likely this year. The move pushes the funds target rate to 2% from the earlier 1.75%.
- The benchmark 10 year government bond closed the month trading at a yield of 7.90%, higher by 5 basis points from the closing levels of the previous month.
- Yield on 10 year AAA PSU bond closed the month at approx. 8.65%, compared to the 8.80% levels witnessed in the previous month.
- One year CDs ended the month yielding about 8.10%, indicating a 30 basis points fall in yields over the month.

How to read Factsheet

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 - Year Gsec.

Entry Load : A Mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharp Ratio : The Sharp Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the rating. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Tax Benefits / Consequences: The Dividend Distribution Tax on distribution of income by equity oriented fund to all the investors shall be payable at the rate of 11.648%* and no distribution of income by other than equity oriented fund to an individual / HUF shall be payable at the rate of 29.12%* and at the rate of 34.9444%* on distribution of income to any other investor. Such income distributed by the Scheme(s) is free from Income tax in the hands of Investors. Units of the Scheme(s) are not subject to Wealth-tax and Gift-tax. Unitholders are required to pay Securities Transaction Tax (STT) at the rate of 0.001% at the time of redemption / switch-out of units of an equity-oriented fund. *including applicable surcharge, health and education cess.

Investors should be aware that the fiscal rules/tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his /her own professional tax advisor.

Direct Plan was introduced for all schemes with effect from January 1, 2013
