*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully

FROM THE CEO'S DESK

Dear Investor,

The great NPA clean up act in India continues and is expected to continue for some time. While this causes hardships for the time being, once the slate is cleaned and everything provided for, Indian Public Sector Banks are expected to look up again. In the meantime, the Private Sector banks and NBFCs are expected to corner a large share of business.

We saw the Indian Equity markets remain stable (not yet right to call them volatile) and we need to watch the direction the markets may take. Some of the global economies are doing exceptionally well and one can say that most of the world economies barring a few exceptions like Venezuela are doing well. The Trade war fears did give some jitters to the world markets but most of the markets took it in their stride. It will be early to say today whether Trade war fears have ceased completely however it will be safe to say that those fears are not overarching at this moment.

Though one does not know when a negative global trigger may hit markets globally no such trigger can be seen at this point of time.

On the Domestic front as well, the triggers seem to be absent barring the political ones. It will be interesting to watch in which direction the Karnataka electorate votes in the state elections due in Karnataka in May 2018. Following Karnataka shall be Rajasthan, Chattisgarh and Madhya Pradesh and all these assume added significance since the Central elections are also due in 2019.

On the debt side, the US increased the Fed rate and there was a high probability India will follow suit. However a low CPI number, apparently, helped the RBI maintain the earlier Repo rate and the Reverse Repo rate unchanged.

It will be early to say that RBI will not hike the interest rate in the near future. As the chances of RBI increasing the rate mount, long term debt funds may not be a good option for the investors and a focus on Liquid Funds (for short term investments) and Equity/balanced Funds (for long term investments) appears to be a good idea. The SIP remains an evergreen option.

As we move forward in the financial year 2018-2019, with the effects of demonetization and GST implementation behind us, the future appears brighter than FY 2017 and FY 2018.

We wish all our investors a wonderful FY 2019.

Thanking You

A handwritten signature in black ink, appearing to read 'Waqar Naqvi'. The signature is stylized and written in a cursive-like font.

Yours truly,
Waqar Naqvi
Chief Executive

TAURUS STARSHARE (MULTI CAP) FUND - (An open ended equity scheme investing across large cap, mid cap, small cap stocks) (earlier known as Taurus Starshare Fund)

SCHEME FEATURES

Investment Objective

The basic objective of the Scheme is to provide long-term capital appreciation. Emphasis will be on sharing growth through appreciation as well as on distribution of income by way of dividend.

Fund Manager

Mr. Prasanna Pathak (w.e.f. June 30, 2017)

Portfolio Turnover: 2.06

Fund Manager's Comment: True to its mandate, the portfolio maintained its character for infrastructure themes. The recent effort in pushing massive infrastructure project has induced positive sentiments in the sector. The significant policy reforms in coal, gas, infrastructure and power sector is providing significant boost to the sector's future outlook. Infrastructure remains an important pillar of India growth story and we have strong conviction of its come back in near future. Sector has been under pressure since last few years due to multiple factors. We expect the sector to outperform in the coming times.

Beta: 1.04

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

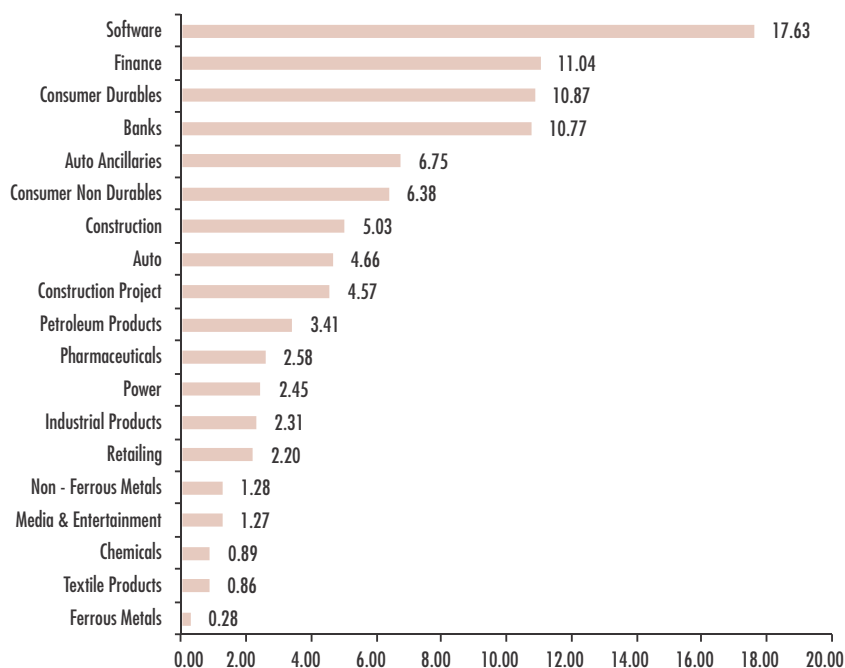

Portfolio Turnover: 3.38

Fund Manager's Comment: The scheme will try to invest in emerging themes in the next few years and play it through a blend of mid-cap and large cap stocks. For example, the Indian government's ambitious target of doubling farm income by 2022 should benefit stocks in the rural theme. Similarly, GST will lead to formalisation of economy and benefit sectors where the share of unorganised players is higher. Again, government's 'Housing for All' project will benefit cement, building material players and Housing Finance companies. The scheme will try to construct a portfolio in-and-around such emerging themes.

Standard Deviation: 13.96

Beta: 0.99

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 7.01

Fund Manager's Comment: Scheme has bias towards high quality large cap stocks with overweight position in BFSI and rural consumption plays. The sustained regulatory change and positive policy frame work coupled with economic recovery should prove to be tailwind for the stocks in the BFSI sector. The Indian government's ambitious target of doubling farm income by 2022 should benefit stocks in the rural theme. Increase in weight in the cyclical commodity sector is tactical in nature.

TAURUS DISCOVERY (MIDCAP) FUND - (An Open ended equity scheme predominantly investing in mid cap stocks) (earlier known as Taurus Discovery Fund)

SCHEME FEATURES

Investment Objective

The primary objective of the Scheme is to identify and select low priced stocks through price discovery mechanism, which would broadly include:

- To capitalise on available opportunity on growth potential offered by undervalued stocks, especially in the midcap and smallcap space.
- Such stocks being low priced and if dividend paying, decent dividend yield will give desired cushion in the volatile capital market.
- Many of such cases where investment will be made may be turnaround cases, therefore, greater potential for improvement in NAV.

Beta: 1.00

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 4.35

Fund Manager's Comment: Scheme has bias towards undervalued mid-cap stocks with overweight position in BFSI, rural consumption plays, industrials and commodities. We have positioned our portfolio across these themes and companies that will have sustainable growth in coming years. We see larger upside to these ideas than some of the large well run efficient companies.

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 1.07

Fund Manager's Comment: Our overall call has been inspired by the revival of the demand in the areas of specific focus by Government. We have added few more NBFC's to take advantage of this. We have maintained a positive bias on Private Banks given their resilience to generate profitability in stressed times. In PSU banks the exposure has been restricted to larger players with relatively improving asset quality outlook and faster prospects of stabilisation.

Fund Manager's Comment (Equity Schemes):

During the month, global markets witnessed significant volatility on rising risk of trade wars, and allegations of data breach by social media companies. Indian markets took cues from global markets and traded in a range with a downward bias. Benchmark Indices Sensex/Nifty closed with gains of - & - respectively for the month.

On the global front, the US Federal Reserve increased interest rates by 25bps in line with expectations while suggesting two more rate hikes in 2018, against expectations in some quarters of three additional rate hikes which provided some respite to US bond yields.

On the domestic front, the markets have something to cheer about with evidence of demand revival in selected pockets (IIP data, core sector growth, monthly vehicle sales data, fuel consumption data and GDP numbers), which all point toward improving trend in macros. Further, there are indications about green shoots of capex recovery in sectors such as steel, cement and refinery.

We expect the global equity markets to continue to be volatile, with geopolitical uncertainty weighing on markets. The corporate earnings would be keenly watched for further triggers for the markets.

SCHEME PERFORMANCE FUND MANAGER WISE

(As on 28th March 2018)

Mr. Prasanna Pathak

Designation: Fund Manager - Equity

Mr. Prasanna Pathak is PGDBM (Finance) from S.P. Jain, Mumbai with 14 years of experience Prior to joining Taurus Asset Management Co. • All the Equity schemes are managed by Mr. Prasanna Pathak w.e.f. June 30, 2017.

Fund Manager's Comment (Debt Schemes):

Significant developments in March 2018 were as under:

- GDP growth for the December quarter came in at 7.2% surpassing expectations. This makes India the fastest growing economy in the world. This growth rate came on the back of a rebound in industrial activity.
- CPI inflation for the month of February came in at 4.44% compared to 5.07% in the previous month. WPI inflation came in at 2.48% compared to 2.84% in the previous month. Both inflation prints were relatively softer than expected and provides hope that the monetary policy committee may not raise rates in the near future.
- Index for industrial production (IIP) for the month of January 2018 grew at a rate of 7.5%. This number was well above expectations and reinforces the belief that the manufacturing economy is well on its way to recovery.
- India's exports jumped 6% (YoY) to \$25.83 bn while imports shrank 7.1 % (YoY) to \$37.81 bn in the month of February 2018. Trade deficit narrowed to \$11.98 bn in February as against \$16.29 bn in January.
- However, India's Current Account Deficit (CAD) for Q3 FY 18 came in at USD 13.48 Bn (2.1% of GDP), higher than USD 7.96 Bn (1.4% of GDP) in Q3 of the previous year.
- The US Federal Reserve hiked its benchmark interest rates by the expected 25 basis points. It also appears that the Fed is likely to hike interest rates thrice in the year 2018.
- Fiscal deficit for the financial year 2017-18 touched approx..7.2 lakh crores till February. This was about 120% of the Revised Estimates in the budget presented in February. This is however due to front loading of expenditure and delayed realization of revenue. The higher revenue receipts in the month of March coupled with lower expenditure in the month is likely to ensure that the government meets its fiscal deficit target for the year.
- The borrowing calendar for the first half of the next financial year (2018-19) was announced late March. As per the agreement with RBI, the government has reduced its target for borrowing in the first half of the financial year to less than 50% of its borrowing requirement. It is scheduled to borrow an amount of INR 2.88 lakh crores through market borrowings in the period April-September 2018.
- This borrowing amount is a little less than 48% of the gross budgeted borrowing for the next year. The government is likely to rely more on the collections in small savings schemes to bridge its fiscal deficit. Also, the maturity profile of fresh issuances shows higher amounts at the shorter end of the yield curve, an idea more palatable to the marketplace.
- The immediate impact of this lower borrowing announcement was an improvement in sentiment in the bond market. Yields fell.
- The benchmark 10 year government bond closed the month trading at a yield of 7.40% after having risen sharply to as much as 7.70% earlier in the month.
- Yield on 10 year AAA PSU bond traded at approx. 8.00%. One year CDs yielded about 7.35%.

Mr. Dheeraj Singh

Designation: Head of Investments and Fund Manager - Fixed Income

Mr. Dheeraj Singh is B.E (Hons), PGD in Management from IIM Bangalore with over 24 years of experience. Prior to that, he served as Head – Fixed Income with Sundaram Asset Management Company. He has extensive experience of consultancy in Banking & Financial Service industry.

Responsibilities: He is the Head - Investments for the all the Schemes of Taurus Mutual Fund. He monitors the Equity & Debt segment investments.

• Past performance may or may not be sustained in the future. Returns are calculated on compounded annualised basis (CAGR). Based on the applicable NAV as on the last business day of the month/period.

• Returns are given separately for Regular & Direct Plan - Growth option. Different Plans have different expense structure.

How to read Factsheet

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 - Year Gsec.

Entry Load : A Mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharp Ratio : The Sharp Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the rating. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Tax Benefits Dividend distributed by the Scheme (s) are free from Income - tax in the hands of Investors. The additional Income Tax on distribution of dividend by a debt fund (including money market or a liquid fund) to an individual / HUF shall be payable at the rate of 28.84%* and at the rate of 34.608%* to any other investor for FY 2015 - 16. With effect from 01/10/2014, Dividend Distribution Tax would apply on gross dividend instead of net dividend. Units of the Scheme(s) are not subject to Wealth-tax and Gift-tax. Unit holders are required to pay Securities Transaction Tax (STT) at the rate of 0.001% at the time of redemption /switch-out of units of an equity oriented fund.

*Including applicable surcharge, education cess and secondary and higher education cess.

Investors should be aware that the fiscal rules/tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his/her own professional tax advisor.

Direct Plan was introduced for all schemes with effect from January 1, 2013
