Standard Deviation: 18.27

Beta: 1.14

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 1.56

Fund Manager's Comment: Scheme has witnessed changes in its sector positioning mirroring the evolving economic situation in India. There is realignment in the weights towards the sectors considered to be significantly benefiting from the cyclical changes as well fall in commodities prices. Scheme will remain oriented towards absolute ideas to generate its Alpha returns in the portfolio and it remains positive on the other investment opportunities in defence, railway and infrastructure and construction themes. Scheme has bias towards high quality large cap stocks with overweight position in BFSI sector. The sustained regulatory change and positive policy frame work coupled with economic recovery should prove to be tailwind for the stocks in the sector. Asset allocation has been increased towards the auto sector on the back increasing volumes and potential normal monsoon; this has been done partly allocating re allocation of gains from cement sector.

Standard Deviation: 13.88

Beta: 1.02

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 2.31

Fund Manager's Comment: Portfolio composition has decisively moved towards absolute ideas with growth tailwinds. This is despite heavy composition of defensives in benchmark Index. This has caused increase of portfolio beta. Portfolio is underweight in FMCG, Pharma and IT sector. Re-alignment in the portfolio has been due to potential broad based recovery in the economy and consequent benefit to Industrial companies in the economy.

Fund Manager's Comment: True to its mandate, the portfolio maintained its character for infrastructure themes. The recent effort in pushing massive infrastructure project has induced positive sentiments in the sector. The significant policy reforms in coal, gas and power sector is providing significant boost to the sectors future outlook. Infrastructure remains an important pillar of India growth story and we have strong conviction of come back in near future. Sector has been under pressure since last few years due to multiple factors. We expect the sector to outperform in the coming times. There is no major change in portfolio construction.

Portfolio Turnover: 1.60

Fund Manager's Comment: Scheme has witnessed changes in its sector positioning mirroring the evolving economic situation in India. There is realignment in the weights towards the sectors considered to be significantly benefiting from the cyclical changes as well fall in commodities prices. Banks have seen cut in the weights and oil and gas has seen an increase. Media and Entertainment sector has seen increase in weight and capital goods and engineering has seen a cut due to lack of revival in private sector capex programme. Scheme will remain oriented towards absolute ideas to generate its Alpha returns in the portfolio and it remains positive on the other investment opportunities in defence, railway and infrastructure and construction themes.

TAURUS DISCOVERY FUND - (AN OPEN-ENDED EQUITY FUND WITH MID CAP AND SMALL CAP FOCUS)

SCHEME FEATURES

Investment Objective

The primary objective of the Scheme is to identify and select low priced stocks through price discovery mechanism, which would broadly include:

- To capitalise on available opportunity on growth potential offered by undervalued penny stocks.
- Such stocks being low priced and if dividend paying, decent dividend yield will give desired cushion in the volatile capital market.
- Lower side risk is minimum in such investments.
- Many of such cases where investment will be made, may be turnaround cases, therefore, greater potential for improvement in NAV.

Fund Manager's Comment: We believe investment themes have expanded in India since the new government has come into the power and focussed on development and governance through its various reform agenda i.e. Defence, Railways, and Make in India, Swachh Bharat, Digital India, Tourism, Namami Gange and other specific initiatives. We are also enthused by the Governments effort to bring efficiency, transparency, governance in the business. We have positioned our portfolio across these themes and companies that will have sustainable growth in coming years. We see upside to these ideas to have much larger than some of the large well run efficient companies. Portfolio has added some tactical position in some good business with stressed out valuations.

Fund Manager's Comment: Portfolio has restricted its weight to few quality PSU banks due to limited opportunity present, given their vulnerable earnings profile. Fund continues to remain focussed on the private banks considering their resilience and larger link to retail exposure. Portfolio strategy is to build companies capable of delivering absolute alphas in volatile market recovery. Scheme has identified few NBFCs cos to take advantage of relatively better growth rate in retail assets and falling interest rate.

Average Maturity Period: 0.16 years

Modified Duration : 0.16 years

Fund Manager's Comment: Easy liquidity and subsequent fall in money market curve has led to a noticeable rise of returns in Ultra Short Term Fund. One year CD closed the month at 7.50%, down ~2bps from last month's closing. Three month CD closed the month at 7.16% , down ~19bps from last month's closing. Benign inflation and easy liquidity guidance are the primary reason behind easing curve. We do not foresee any steep rise in the money market rates, although a marginal should not be surprising. Hence would prefer to maintain a higher than industry average maturity for the scheme.

We have been increasing/decreasing scheme maturity and will continue to do the same as and when we see the direction of the rates turn favorable for capital gains maintaining a judicious balance between bank and non-bank assets.

DIVIDEND HISTORY

The scheme has not declared any dividend in last three months

Fund Manager's Comment: Liquidity deficit continues to remain near 750-800bn as it was during the end of April. RBI had actively conducted OMOs to counter liquidity outflow resulted primarily due to FIIs moving out of the country. All eyes will be on the RBI policy due in early June where the central bank may lay the roadmap for easy liquidity going forward. NBFCs are unlikely to see their borrowing cost recede as demand supply mismatch perpetuate.

We would increase the duration gradually as and when we get to see attractive levels. However, we will maintain a judicious balance between bank and non-bank assets.

Fund Manager's Comment: Not only the SLR segment but corporate bond market as well has witnessed dull sessions for quite some time now. Spreads continue to remain where they were previous month. With limited interest at the far end of the curve, demand for 2-3 year papers has seen some traction however not to the extent which could drive the level substantially. Bonds are expected to trade in a narrow range with a negative bias ahead of key events lined up this month. OPEC is set to meet on June 02 to decide its future course of action over oil supply followed by RBI and then the Fed. Our bias would be to balance duration and accrual strategy for efficient performance. We may tweak the scheme maturity depending on our regular prognosis. We would continue to have a judicious mix of assets in order to deliver consistent optimal performance.

Modified Duration : 4.31 years

Fund Manager's Comment: Debt: Domestic debt traded in a narrow range due to limited cues previous month, only later to correct post IMDs forecast of late monsoon and prolonged heat wave. However, it may change the trajectory in June given a number of global and domestic events are lined up. 10Y benchmark closed the month at 7.47% vis-à-vis 7.44% a month ago. Domestic price data will remain a key cue in addition of weekly monsoon update and anecdotal prices. Going ahead, OPEC is set to meet on June 02 to decide its future course of action over oil supply followed by RBI and then the Fed. Market is not expecting RBI to act on rates for now however it would closely watch out for liquidity guidance.

We will continue with our strategy of trading in gilts as opportunity arises with a judicious mix of corporate bonds to enhance accruals in the scheme.

Equity: Portfolio allocation is spread across BSE 100 companies and concentrated in number to less than 20 companies. Equity exposure is expected to remain under 20% of the overall scheme size.

Gold: Allocation of Gold is expected to remain around 10%.

How to read Factsheet

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 - Year Gsec.

Entry Load : A Mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharp Ratio : The Sharp Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the rating. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Tax Benefits Dividend distributed by the Scheme (s) are free from Income - tax in the hands of Investors. The additional Income Tax on distribution of dividend by a debt fund (including money market or a liquid fund) to an individual / HUF shall be payable at the rate of 28.84%* and at the rate of 34.608%* to any other investor for FY 2015 - 16. With effect from 01/10/2014, Dividend Distribution Tax would apply on gross dividend instead of net dividend. Units of the Scheme(s) are not subject to Wealth-tax and Gift-tax. Unit holders are required to pay Securities Transaction Tax (STT) at the rate of 0.001% at the time of redemption /switch-out of units of an equity oriented fund.

*Including applicable surcharge, education cess and secondary and higher education cess.

Investors should be aware that the fiscal rules/tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his/her own professional tax advisor.

Direct Plan was introduced for all schemes with effect from January 1, 2013
