(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 1.49

Fund Manager's Comment: True to its mandate, the portfolio maintained its character for infrastructure themes. The recent effort in pushing massive infrastructure project has induced positive sentiments in the sector. The significant policy reforms in coal, gas, infrastructure and power sector is providing significant boost to the sector's future outlook. Infrastructure remains an important pillar of India growth story and we have strong conviction of its come back in near future. Sector has been under pressure since last few years due to multiple factors. We expect the sector to outperform in the coming times.

Standard Deviation: 14.66 Beta: 1.05

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 1.87

Fund Manager's Comment: The scheme will try to invest in emerging themes in the next few years and play it through a blend of mid-cap and large cap stocks. For example, the Indian government's ambitious target of doubling farm income by 2022 should benefit stocks in the rural theme. Similarly, GST will lead to formalisation of economy and benefit sectors where the share of unorganised players is higher. Again, government's 'Housing for All' project will benefit cement, building material players and Housing Finance companies. The scheme will try to construct a portfolio in-and-around such emerging themes.

Portfolio Turnover: 5.07

Fund Manager's Comment: Scheme has bias towards high quality large cap stocks with overweight position in BFSI and rural consumption plays. The sustained regulatory change and positive policy frame work coupled with economic recovery should prove to be tailwind for the stocks in the BFSI sector. The Indian government's ambitious target of doubling farm income by 2022 should benefit stocks in the rural theme. Increase in weight in the cyclical commodity sector is tactical in nature.

TAURUS DISCOVERY FUND - (AN OPEN-ENDED EQUITY FUND WITH MID CAP AND SMALL CAP FOCUS)

SCHEME FEATURES

Investment Objective

The primary objective of the Scheme is to identify and select low priced stocks through price discovery mechanism, which would broadly include:

- To capitalise on available opportunity on growth potential offered by undervalued stocks, especially in the midcap and smallcap space.
- Such stocks being low priced and if dividend paying, decent dividend yield will give desired cushion in the volatile capital market.
- Many of such cases where investment will be made may be turnaround cases, therefore, greater potential for improvement in NAV.

Fund Manager's Comment: Scheme has bias towards undervalued mid-cap stocks with overweight position in BFSI, rural consumption plays, industrials and commodities. We have positioned our portfolio across these themes and companies that will have sustainable growth in coming years. We see larger upside to these ideas than some of the large well run efficient companies.

Fund Manager's Comment: Our overall call has been inspired by the revival of the demand in the areas of specific focus by Government. We have added few more NBFC's to take advantage of this. We have maintained a positive bias on Private Banks given their resilience to generate profitability in stressed times. In PSU banks the exposure has been restricted to larger players with relatively improving asset quality outlook and faster prospects of stabilisation.

Fund Manager's Comment (Equity Schemes):

Policy news flow remained supportive post recapitalization of PSU banks. The government announced various policy measures like mega road building project "Bharatmala" and increase in minimum support prices for wheat and rabi crops. The central and state government seems to be providing fiscal stimulus ahead of heavy political calendar. Revival in growth in 2HFY 18 is widely expected on a low base. On the earnings front, corporate results so far, have been a tad better than expectation.

Key concern emanates from higher crude oil prices impacting macro-economic variables. Also, asset quality pressures and high credit costs for financials sector, weak investment cycle and high PE multiples remain key risks for the markets which have moved up at a much faster pace than the corporate earnings.

Going ahead, developments in US & EU, FOMC take on the pace of the rate-hike in US, state assembly election results in India will set the tone for the markets for the month.

SCHEME PERFORMANCE FUND MANAGER WISE

(As on 30th November 2017)

Mr. Prasanna Pathak

Designation: Fund Manager - Equity

Mr. Prasanna Pathak is PGDBM (Finance) from S.P. Jain, Mumbai with 14 years of experience Prior to joining Taurus Asset Management Co. • **Past performance may or may not be sustained in the future. Returns are calculated on compounded annualised basis (CAGR). Based on the applicable NAV as on the last business day of the month/period.**

- Returns are given separately for Regular & Direct Plan - Growth option. Different Plans have different expense structure.
- Direct Plan was introduced for all schemes w.e.f. January 1, 2013 and have not been in existence for more than 5 years, no returns are available.

• All the Equity schemes are managed by Mr. Prasanna Pathak w.e.f. June 30, 2017.

Fund Manager's Comment (Debt Schemes):

Some of the significant developments in November 2017 were as under:

- India's GDP growth for Q2 of FY18 came in at 6.3%, higher than the 5.7% seen in the previous quarter. This was largely in line with expectations. GDP growth was driven primarily by the industrial sector.
- In another data release the Indian government's fiscal deficit for the period April 2017 - October 2017 stood at INR 5.25trn, which is 96% of the budgeted fiscal deficit. This compares to 79% figure for the deficit figure of the corresponding period last year.
- Standard & Poors decided to keep India's credit rating unchanged. This comes after Moody's had upgraded India's credit rating in the middle of November.
- Yield on government bonds rose after the S&P decision and the release of GDP figures. The benchmark 10 year government bond yield rose to 7.05% by the end of November 2017.
- Inflation based on CPI for October 2017 came in at 3.58% compared to 3.28% in the previous month, primarily due to rise in prices of food and fuel.
- Inflation based on WPI also rose sharply to 3.59% in October compared to 2.60% in September primarily on the rise in prices of primary articles and the fuel group.
- Index of industrial production (IIP) for the month of September came in at 3.9% as compared to 4.5% in the previous month.
- GST rates for a large number of products (more than 170 of them) which were earlier in the highest rate slab of 28% have been reduced. Most are now taxed at 18%. Consequently only 50 items will now be taxed at 28% rates. Further rationalization of GST rates and procedures can be expected.
- India's trade deficit in October stood at \$ 14.02 bn compared to \$ 8.97 bn as exports shrunk and oil import bill rose in line with the rise in crude prices.
- Bonds rallied in the immediate aftermath of the Moody's upgrade but gave up all their gains forcing RBI to cancel their scheduled open market sale of securities in the third week of the month.
- In geopolitical developments earlier in the month, the purge of royal princes and ministers in Saudi Arabia and other developments in the middle eastern region like the resignation of Lebanon's PM dominated the news. Crude oil prices rose in view of the uncertainties.

Mr. Dheeraj Singh

Designation: Head of Investments and Fund Manager - Fixed Income

Mr. Dheeraj Singh is B.E (Hons), PGD in Management from IIM Bangalore with over 24 years of experience. Prior to that, he served as Head – Fixed Income with Sundaram Asset Management Company. He has extensive experience of consultancy in Banking & Financial Service industry.

Responsibilities: He is the Head - Investments for the all the Schemes of Taurus Mutual Fund. He monitors the Equity & Debt segment investments.

How to read Factsheet

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 - Year Gsec.

Entry Load : A Mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharp Ratio : The Sharp Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the rating. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Tax Benefits Dividend distributed by the Scheme (s) are free from Income - tax in the hands of Investors. The additional Income Tax on distribution of dividend by a debt fund (including money market or a liquid fund) to an individual / HUF shall be payable at the rate of 28.84%* and at the rate of 34.608%* to any other investor for FY 2015 - 16. With effect from 01/10/2014, Dividend Distribution Tax would apply on gross dividend instead of net dividend. Units of the Scheme(s) are not subject to Wealth-tax and Gift-tax. Unit holders are required to pay Securities Transaction Tax (STT) at the rate of 0.001% at the time of redemption /switch-out of units of an equity oriented fund.

*Including applicable surcharge, education cess and secondary and higher education cess.

Investors should be aware that the fiscal rules/tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his/her own professional tax advisor.

Direct Plan was introduced for all schemes with effect from January 1, 2013
