Fund Manager's Comment: Infrastructure remains an important pillar of India growth story. A higher cash allocation was preferred in anticipation of the severing of Covid-19 crises which would impact infra-based companies. However, we continue to align our portfolio with a strong balance sheet coupled with reasonable valuations. Going ahead, government thrust in this space, we continue to focus on companies with good financial health and healthy ratios, now have improved outlook.

Disclosure: Reconstituted Portfolio

This is with reference to Gazette Notification dated 13th March, 2020 issued by Ministry of Finance (Department of Financial Services) notifying 'Yes Bank Limited Reconstruction Scheme, 2020'.

As per clause no. 3(8)(a) of Yes Bank Ltd 2020, a lock-in period of three (3) years is imposed to the extent of 75% of "Yes Bank Equity Shares ("YBES")" held by existing shareholders on the date of the commencement of the Scheme i.e. March 14, 2020. These restrictions will apply to all those shareholders who own over 100 YBES.

It is decided that in order to have uniform valuation of locked-in Yes Bank shares, any realisation post the lock-in period shall be distributed to the existing set of investors as on March 13, 2020.

The detail of holding of scheme as given below:

Fund Manager's Comment: Scheme has bias towards high quality large cap sector leaders with higher weights in Banks, Pharma, Information Technology and especially consumer stocks, which are well placed to capitalize on the opportunity as people engage in stocking up essentials & groceries. The rate cuts directly help banking sector while the NPA stress may not increase, if not reduce. There was focus was reducing exposure to cyclical as well as commodities.

Fund Manager's Comment: For the month, we preferred to keep a relatively increased proportion of cash in the fund in the light of slower bank credit growth and anticipation of recession-based economy which caused banks to underperform. Overall, we have maintained a positive bias on Private Banks with decent capitalization coupled with prospects of improving credit demand. In NBFC sector, the exposure has been tilted to players who have clear resilience to liquidity shortage and a sustained growth prospect.

Fund Manager's Comment (Equity Schemes):

Inflation has evidently been the top concern for the global equity markets with uncertainty pondering when it hits the roof. Even in the developed countries, people have started cutting down discretionary items due to higher spend on essentials. The impending recession could result in lower consumer spending, rising input costs, higher interest rates and corporations holding more debt than ever.

Central Banks including RBI which recently hiked repo rate in an unexpected off-cycle meeting along with a hawkish stance of Fed and ECB indicate their efforts to tame the devastating impact of inflation on economic growth.

Fortunately, corporate India has deleveraged and profitability won't be impacted for majority of them at least due to servicing oversized debt. However, operating profit would likely be hit due to higher feedstock prices due to global supply chain issues resulting into margin erosion. In addition, price hikes beyond a point would dampen consumer sentiment and eventually demand.

As for the ongoing corporate results season, early bird results suggest a slowdown in near-term. With the absence of liquidity support, individual stock picking based on bottom-up approach remains a good strategy. We continue to be positive on sectors which can be seen as an inflation hedge including real estate, commodities and metals.

(Notice cum Addendum dated 5th October 2021)

How to read Factsheet

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 - Year Gsec.

Entry Load : A Mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharp Ratio : The Sharp Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the rating. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Tax Benefits / Consequences: The Dividend Distribution Tax on distribution of income by equity oriented fund to all the investors shall be payable at the rate of 11.648%* and no distribution of income by other than equity oriented fund to an individual / HUF shall be payable at the rate of 29.12%* and at the rate of 34.9444%* on distribution of income to any other investor. Such income distributed by the Scheme(s) is free from Income tax in the hands of Investors. Units of the Scheme(s) are not subject to Wealth-tax and Gift-tax. Unitholders are required to pay Securities Transaction Tax (STT) at the rate of 0.001% at the time of redemption / switch-out of units of an equity-oriented fund. *including applicable surcharge, health and education cess.

Investors should be aware that the fiscal rules/tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his /her own professional tax advisor.

Direct Plan was introduced for all schemes with effect from January 1, 2013
