Fund Manager Comments : Infrastructure remains an important pillar of India growth story. However, we continue to align our portfolio with a strong balance sheet coupled with reasonable valuations. We believe that we are at the cusp of a capex cycle which will last for the coming 3-4 years. Hence the portfolio is more tilted towards companies which will benefit out of the capex cycle.

Note: Mr. Hardik Shah has been appointed as the Fund Manager for Taurus Infrastructure Fund w.e.f June 13, 2023 (Notice cum Addendum dated 15th June 2023). Earlier, since 1st November 2022 Ms. Neha Raichura was Fund Manager for this scheme.

Why Taurus Infrastructure Fund ?

- For any growing economy, investments in infrastructure are the key to future economic growth. Recognizing that good infrastructure is an enabler for economic growth, the incumbent government is focused on improving India's infrastructure by undertaking public spending as well as incentivizing private capex.
- Dedicated infrastructure fund that can invest in various sub-sectors which are likely to outperform in the on-going capex driven cycle.
- To provide investors with opportunities for potential long-term growth through investments in a diversified basket of stocks in sectors which according to us, directly or indirectly aid in contributing to India's Infrastructure growth story.
- The Infrastructure space can be a broad gamut to look at, however we prefer to invest in select high growth sub sectors. We desire to stick to a range of 30-32 stocks that may provide an optimal trade-off between concentration risk and returns.

Why Taurus Tax Shield Fund?

Qualifies for Tax Exemption under Section 80C of Income Tax Act, 1961

A 3-year lock-in period helps investors maintain longer term horizon

Market cap Agnostic

Invest in companies with attractive unit economics and risk/reward across market capitalizations

Long term Capital Appreciation

Hold a portfolio of companies that, in our opinion, have lower terminal value risk than an average company over long term

Balanced Portfolio Construction

Non dogmatic value investing with context: Compounders, Cyclicals, Special Situations and Asset Plays

Rational Approach

Buy, hold and sell businesses more objectively than try to be contrarian or with consensus

Investing in Businesses and Managements with long term track record

Reduces the risk of investing in companies that could potentially be poorly governed

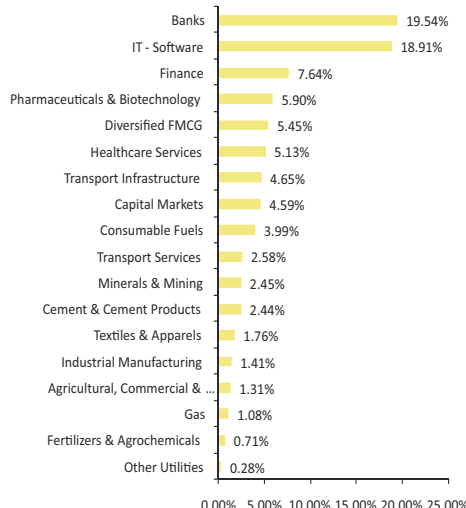

Basket Approach in Select Sectors

Take positions across companies within undervalued sectors to reduce company specific risks and still actively take larger positions in companies with great long term track record of capital allocation and good growth prospects, as per our research

Why Taurus Nifty 50 Index Fund ?

- Great for investors who want to invest in equities but do not want to expose yourself to the risks associated with actively managed equity funds
- Great for investors who want to benefit from India's economic growth but do not have time/ability to research individual stocks or processes of active mutual funds
- Equities are volatile in short term, but an index fund averages out gains over longer term, leading to more sustainable returns
- Less than one-fifth the management fee of an actively managed equity mutual fund
- Actively managed equity mutual funds are prone to human errors and not beating Nifty50 index while charging higher fee whereas our Index fund has no such risk as it mimics the index performance while charging lower fee

"If you like spending six to eight hours per week working on investments, do it. If you don't, then dollar-cost average into index funds." ~Warren Buffett.

Fund Manager Comments : The index fund continues to track the performance of its benchmark indices Nifty. The fund portfolio consists of the stocks in the same weight as they are in the Nifty Index. The strategy of the investment is to mirror the index return by minimizing the tracking error with its benchmark.

Taurus Discovery (Midcap) Fund (G)	Rs. 19.08

Why Taurus Discovery (Midcap) Fund?

- An opportunity to the investors to build wealth in the longer term by investing in quality midcap stocks which subject to associated risks, may result in capital appreciation.
- Intends to build a diversified portfolio across sectors in low number of companies aiming to increase the return potential with an acceptable risk profile.
- A bottom-up approach is followed to identify quality companies at attractive valuations.
- It also allocates its assets in the small cap space tactically to take exposure to the wealth creating opportunities in this space.

Why Taurus Banking and Financial Services Fund?

- Since the banking system is the backbone of any growing economy, we are optimistic on the Indian BFSI Space.
- Post the reforms by the current government, Indian BFSI space is structurally in a sweet spot for long term growth.
- Positioned to benefit from improving financial inclusion across the country and capture the potential upside because of credit growth in the economy.
- Investment is done in the BFSI space where the companies as selected are well managed, adequately capitalized, resilient to liquidity shortage and have a potential to benefit from credit growth in the economy.

Fund Manager Comments : Overall, we have maintained a positive bias on Private Banks with decent capitalization coupled with prospects of improving credit demand. In NBFC sector, the exposure has been tilted to players who have clear resilience to liquidity shortage and a sustained growth prospect.
